Summary

AI and Machine Learning enthusiast with hands-on experience developing intelligent applications using Python, deep learning, and modern AI techniques. Skilled in building machine learning models, data-driven solutions, and AI applications using Retrieval-Augmented Generation (RAG) and LLM integration. Strong foundation in end-to-end model development, data preprocessing, and evaluation, with practical exposure to real-world problem-solving. Seeking an AI/ML internship or entry-level role to contribute to real-world AI systems and intelligent application development.

Education

Lakhotiya Bhutada High School and Junior College, Kondhali SSC	May 2012 – June 2018
Lakhotiya Bhutada High School and Junior College, Kondhali HSC	July 2018 – July 2020
Yeshwantrao Chavan College of Engineering, Nagpur Bachelor of Technology (Information Technology)	Dec 2021 – May 2025

Internships

Data Analytics Intern — ICEICO Technologies Pvt. Ltd.	Jan 2025 – July 2025
- Analyzed 3,000+ employee records across 27 HR features to identify patterns in attrition, engagement, and performance - Designed KPI-driven Power BI dashboards for workforce planning, diversity, and retention insights - Developed machine learning models (Logistic Regression, Random Forest, XGBoost) for predicting attrition and performance - Performed data cleaning, feature engineering, and exploratory data analysis (EDA) - Generated structured insights and reports to support data-driven HR decision-making	

Projects

CosmoGuide – AI-Based Space Knowledge Companion	Jan 2026 – Apr 2026
- Developed an AI-powered application using Retrieval-Augmented Generation (RAG) for answering space-related queries - Integrated multiple LLM APIs (Gemini, Groq) for response generation - Implemented semantic search using FAISS-based vector embeddings for improved information retrieval - Designed a modular pipeline for query processing and LLM-based response generation - Built an interactive web interface using Streamlit for visualization and user interaction - Integrated NASA APOD API for real-time astronomy data Technologies: Python, Streamlit, FAISS, PyTorch, LangChain, APIs	
Non-Invasive Liver Cancer Detection using Deep Learning	Sep 2023 – Oct 2023
- Developed CNN-based models using TensorFlow/Keras for cancer classification from CT scan images - Applied data preprocessing and augmentation techniques to improve model performance - Evaluated architectures including VGG16 and ResNet50 using accuracy metrics - Achieved 89% accuracy on test data Technologies: Python, TensorFlow/Keras, OpenCV, NumPy, Pandas, Matplotlib	

Movie Recommendation System

Jan 2024 – Feb 2024

- Built a content-based recommendation system using cosine similarity
- Processed 5000+ movie records using NLP preprocessing techniques
- Developed a Flask-based web application for user interaction
- Generated personalized movie recommendations based on user input

Technologies: Python, Scikit-learn, Pandas, NLTK, Flask, Pickle

AI-Driven Prediction of Stem Cell Outcomes

July 2024 – Nov 2024

- Developed machine learning models to predict stem cell differentiation outcomes
- Performed feature engineering and preprocessing on biological datasets
- Evaluated models including Neural Networks, Decision Trees, and Random Forest
- Achieved 85% accuracy using ensemble methods with hyperparameter optimization

Technologies: Python, Scikit-learn, TensorFlow, Pandas, NumPy, Matplotlib

Workforce Data Analysis & HR Predictive Modeling

Jan 2025 – July 2025

- Built an end-to-end analytics pipeline from raw data to dashboards
- Designed Power BI dashboards for HR insights (attrition, hiring, performance)
- Developed predictive models using Logistic Regression, Random Forest, and XGBoost

Technologies: Python, Scikit-learn, Power BI, Pandas, NumPy

Technologies

Languages: Python, C, SQL

AI/ML: Machine Learning, Deep Learning, CNN, RAG, LLM Basics

Frameworks & Tools: TensorFlow, Keras, PyTorch, Scikit-learn, Pandas, NumPy

Visualization: Matplotlib, Seaborn, Power BI

Web & Applications: Streamlit, Flask

Tools: PyCharm, Jupyter Notebook, VS Code, GitHub, Anaconda, Kaggle

Databases: MySQL

Certifications

- 100 Days of Python Bootcamp – 2026
- Data Science Course (CodeWithHarry) – 2026
- Machine Learning with Python – 2024
- Python for Data Science, AI Development – 2024
- Tata GenAI Powered Data Analytics
